

NEXGEN® ADVANCED 60/50 PT + AA

PRODUCT DESCRIPTION

NexGen® Advanced 60/50 PT + AA is designed for antibiotic-free programs where plant based protein and energy is desired. This low-inclusion premix, with lysine and phytase, should be mixed with corn and soybean meal to make growing and finishing pig, sow, and boar diets.

FEATURES & BENEFITS

Plant-Based Protein and Energy

This product should meet the requirements of most niche or natural pork programs. Always confirm with your program certifier before feeding the product.

Synthetic Amino Acids

Includes synthetic methionine and threonine for mixing convenience and efficient gains and feed efficiencies.

HiPhorius™

Using the latest generation of phytase reduces the amount of added inorganic phosphorus needed to meet the pigs' specific requirements, reducing feed cost and improving environmental impact and sustainability.

Trace Minerals and Vitamins

Formulated to provide trace minerals and vitamins to help support optimal animal health and performance.

Flexible Premix

This premix can be used across multiple growing and finishing weights as well as lactating and gestating sows.

FEEDING DIRECTIONS

Feed below diets as the sole feed to swine. For detailed mixing and feeding directions, consult your Kent Nutrition Group swine representative.

CAUTION: Follow label directions. The addition to feed of higher levels of this premix containing selenium is not permitted.

NEXGEN® ADVANCED 60/50 PT + AA

For growing-finishing pigs, sows and boars.

GUARANTEED ANALYSIS

Crude Protein, min	14.0%
Lysine, min	3.9%
